

SIMPLIFIED CHICKEN FEEDING GUIDE

FEEDING CHICKS

What to Feed

Finely ground organic mash 'chick starter' with a protein content of 17-18%.

How to Feed

Feed twice daily and provide clean water at each feeding. Use covered chick feeders to prevent wasted feed.

FEEDING LAYERS

What to Feed

At 6 weeks, switch to a grower mash with 16%-17% protein content. At 20 weeks switch to layer mash with added calcium.

How to Feed

Free feed mash, grit and oyster shell. Fresh water daily.

FEEDING BROILERS

What to Feed

After 6 weeks, switch to a grower mash with 16%-17% protein content.

How to Feed

Feed twice daily and provide clean water at each feeding. Provide enough feeders to prevent crowding.

100 broiler chicks will eat about 100 kg. (220 lbs.) of starter feed in 6 weeks.

750-800 kg. (1,600 – 1,700 lbs.) of grower mash to raise 100 meat birds to average 2.2 kg. (5 lbs.) in 10 weeks.
